

R1 TUBING HANGERS

The Great North Wellhead & Frac (GNWF) “R1” (no B.P.V.), and “R1-B” (c/w B.P.V.) are tapered body threaded single completion tubing hangers that can include a down-hole control line preparation(s) if required. The hanger’s annular seal is made up of two body O-rings. The “R1”, “R1-B” tapered body tubing hangers are offered in both 7 1/16” and 9” bore sizes only.

The “R1” and “R1-B” tubing hangers can be supplied with most box tubing thread sizes up to and including 4 1/2” External Upset Ends (EU) Larger sizes (9” offering) up to and including 7” Long Casing (LC), as well as many premium threads the customer may require.

NOTE: Please contact GNE for further available sizes and supporting sizes.
